

Setup Instructions

Please Note:

- API KEYS for google Maps is Removed.
- GoogleService.json file for Firebase is Removed.
- Please make sure the app is connected to internet.

Instructions:

Google Maps:

- Please add you API key into the google_maps_api.xml, You can find the file under values folder
- Replace <YOUR_API_KEY_HERE> with your own API KEY.

FireBase:

- Download a copy of GoogleServices.json file from your FireBase project, Paste it into the root app folder.

p.s I know app will be tested by skilful and senior developers, this is just a summary of settings. Can be useful.
